CODEJOCK SOFTWARE'S TOOLKIT PRO 2013 FOR VISUAL C++ MFC NAMED 2013 COMMUNITY CHOICE AWARD WINNER BY THE DEV PRO COMMUNITY

MORRICE, Michigan, November 22, 2013 – Codejock Software announced today that its Toolkit Pro 2013 for Visual C++ MFC solution has earned the Bronze distinction in Penton Media's *Dev Pro* annual awards program.

Codejock Software was named the 2013 Community Choice Bronze Award winner in the Best Component Set category for Toolkit Pro 2013 for Visual C++ MFC solution. According to *Dev Pro*, the 2013 Community Choice Awards represent the cream of the crop in the various markets the magazine covers.

"Participation in our 2013 Community Choice awards was excellent," said Jason Bovberg, senior editor at Penton. "Our *Windows IT Pro*, *SQL Server Pro,* and *DevPro* awards programs are unique in that the product-nomination process is open to readers. We don't just present a predefined list of products and services, thereby limiting scope. Instead, the community both nominates and votes for the best products of the year, ensuring a nice breadth of inclusion in the surveys. Our winners have earned a unique honor to stand out among their peers as winners of our Community Choice Awards."

Codejock's Toolkit Pro 2013 includes a robust set of graphical user interface components for Visual C++ / MFC developers combining 11 of their most popular components: Command Bars, Controls, Chart Pro, Calendar, Docking Pane, Property Grid, Report Control, Shortcut Bar, Syntax Edit, Skin Framework and Task Panel. With Toolkit Pro 2013 you can create professional applications that incorporate a full set of highly customizable user interface components including Visual Studio style docking panes and Office style Ribbons, Toolbars and Menus to give your application a modern appearance.
