Codejock Software Introduces Xtreme SkinFramework Bundle 2007 for Visual Studio .NET

Xtreme SkinFramework Bundle combines two of our most popular products, Xtreme CommandBars and Xtreme SkinFramework. SkinFramework will completely skin every part of an application with today's most popular themes including Windows XP and Windows Vista themes. The CommandBars will provide Microsoft style toolbars, Ribbon bar, menus, pop-ups, tabbed MDI interface, status bar, and much more which can all be skinned using the SkinFramework Bundle 2007.

OWOSSO, Michigan, May 23, 2007 – Codejock Software a leading provider of cutting-edge user interface components, today has announced the release of Xtreme SkinFramework Bundle 2007 for Visual Studio .NET®, providing a comprehensive set of fully customizable user interface components for use with Visual C++ MFC, ActiveX COM and Microsoft.NET development platforms.

Acquiring a professionally themed application just got easier. Codejock Software's Xtreme SkinFramework Bundle 2007 provides Windows developers with a highly sophisticated skinning technology that was developed with Windows Themes (Visual Styles) in mind. Achieving a completely themed application can be accomplished with simply a few lines of code.

The Xtreme SkinFramework Bundle provides maximum compatibility with existing Windows XP and higher Visual Styles. Developers are empowered with an enhanced set of highly sophisticated tools to completely skin their application framework and components on all Windows platform. Every piece of an application can be skinned including components such as the title bar, window frame, buttons, edit controls, check boxes, etc, delivering professional appearance.

Included in the bundle is Xtreme CommandBars A professional modern appearance can be achieved by using MDI tabs that are similar to many popular Microsoft products. The Xtreme Commandbars also includes an Office 2007 style Ribbon Bar, menus, pop-ups, and style toolbars and RTL support.

The Xtreme Skinframework Bundle 2007 gives your Windows application toolbars and menus a professional modern appearance similar to many popular Microsoft products. With a few lines of code the SkinFramework will completely skin every part of an application with today's most popular themes including Windows XP and Windows Vista themes.
