FOR IMMEDIATE RELEASE:

Codejock Releases Toolkit Pro and Suite Pro v15.1.1 for Visual C++ and ActiveX

This release introduces many new features, controls and enhancements including Office 2010 style skins, Windows 7 style transparent toolbars, Office 2010 style recent file list, Visual Studio 2010 style tabs and panes, Radar and Polar chart types, Logarithmic scale charts, Visual Studio style splitter window for Syntax Editor, many Report Control enhancements and much more.

MORRICE, Michigan, July 20, 2011 – Codejock Software, a leading provider of modern user interface components, today announced the release of Toolkit Pro 2011 v15.1.1 for Visual C++ MFC and Suite Pro 2011 v15.1.1 for ActiveX COM.

Some highlights from this release include:

Radar and Polar Charts: Radar/Polar charts can use several difference styles to display data including Area, Spline Area, Line, Line Area and Point. Furthermore, they can be displayed as a circle diagram or "spider" diagram (straight lines).

Logarithmic Scale Charts: A logarithmic scale allows data across a very large range to be displayed in an easy to read chart.

Office 2010 Style Recent File List: The Office 2010 style recent file list can be used to display previously opened files in the backstage view. This control can also be displayed as a normal list box in the backstage view.

Office 2010 Skin Support: Skin Framework now includes Office 2010 blue, black and silver skins.

Visual Studio 2010 Style Tab and Panes: Tabs and Panes can now be displayed using the Visual Studio 2010 style.

Windows 7 Style Transparent Toolbar: The CommandBars now support Windows 7 style transparent “composition” toolbars.

Report Control Enhancements: The Report Control received many enhancements including smooth scrolling, enhanced merge cell support, header/footer sorting and grouping, customizable report behaviors, header/footer records in virtual mode, and much more.

Syntax Edit Splitter Window: Visual Studio style splitter windows are now supported for the ActiveX COM version. Splitter windows allow multiple versions of the same file to be displayed in up to four views at the same time.

A complete list of all new features can be found in the release notes for each product located on the company’s website, www.codejock.com.

About Codejock
Codejock Software, a division of Codejock Technologies, LLC is based in Morrice, Michigan and provides reusable software components to enhance the user interface of Windows Desktop Applications. Codejock components help to facilitate rapid software development using Visual C++ MFC, ActiveX COM and .NET technologies. Codejock is committed to helping software

developers realize their goals with modern interface components, superior customer service and technical support. Codejock's products and evaluation versions are available for download on the company's website, for more information visit www.codejock.com.
