FOR IMMEDIATE RELEASE:

Codejock Releases Toolkit Pro and Suite Pro 2011 v15.2.1 for Visual C++ and ActiveX

This release introduces many new features, controls and enhancements including Office 2010 style Ribbon customize dialog, new Taskbar Manager control, Visual Studio 2008/2010 style docking stickers, new Step and Range Area chart types, Virtual and Batch options for improved chart speed, many Calendar and Report enhancements and much more.

MORRICE, Michigan, December 9, 2011 – Codejock Software, a leading provider of modern user interface components, today announced the release of Toolkit Pro 2011 v15.2.1 for Visual C++ MFC and Suite Pro 2011 v15.2.1 for ActiveX COM.

Some highlights from this release include:

Ribbon Customization: The Office 2010 style Ribbon Customization dialog allows the various parts of the ribbon to be customized by the user in an easy to use dialog.

New Docking Stickers: Visual Studio 2008 and 2010 style docking stickers have been added to complete the 2008 and 2010 docking themes.

Range Area Chart Style: The new Range Area chart style has been added to the chart.

Step Area Chart Style: The Step chart style now supports showing area.

Virtual Charts: Virtual series have been added to dramatically improve chart speed when many data points are needed to be displayed.

Batch Add Data Points: Another option to help speed up the chart is the ability to batch add data to the chart all at one time minimizing the resources used to add the data.

Calendar Improvements: In addition to many fixes, the calendar now lets the user specify which day is shown as “Today”, multi-month print option, ability to scroll all day events, option to hide all day events area, and much more.

A complete list of all new features can be found in the release notes for each product located on the company’s website, www.codejock.com.
